To the foregoing, add the lact that every breath of air drawn late, the tevery breath of air drawn into, the lungs is drawn over the diseased surface, festering with Catarrhal matter, and who can deny the assertion that to neglect Catarrh is to invite Consumption:

Consumption is the one prevailing disease, at the present day, with which the young and middle-aged die. And yet very seldom do the lungs receive the primary shock. It is first "a coid in the head," which resolves into Chronic Catarrh, from which the su ect feels no alarm, until, step by step, it reaches the lungs, when all attempts at cure are little better than blind experiments.

With every incentive to enjoyment and usefulness, there are hundreds all around us dying in the morning of life, of Censumption, who can look back six months, a year, or longer, as the case may be, to a time when

The National Life Insurance Company of the United States of

An insurance company, authorized Union; was chartered by special act of Congress, in July last, and has begun etive work in this and other States. The new Company has some especially noticeable features and facts to commend it to popular attention. One of these is its paid up capital of one mil lion dollars, which provides amply for Saturday Noon, January 9th, all liabilities that may arise. The list of managers of the Company includes C. H. Clark, as President, Jay Cooke, Chairman of Finance Committee, and others whose names are too high in national renown as upright and successful business men, to risk their reputations in any doubtful enterprise. pations. Another plan provides that by the payment of a slightly increased yearly premium, the Company will remoney which has been paid in premiums, in addition to the amount for which he was insured, thus giving the insurance for no more than the interest upon the premiums. By this plan, if a person insures for \$10,000, and has paid \$2,500 in premiums, his heirs will obtain \$12,500 at his death. Another special feature of the National life is that it insures females at the same rate as males. By the charter, its policies are all non-forfeitable, and arealso exempt from attachment, although they may be negotiated like other property .-These and other specialities of the new Company will be explained at length by the Company's agents who are advertised elsewhere in this paper. We see every reason to anticipate an immense business for the new Company, starting under such extremely favora-

THE NATIONAL BAILBOAD BILL. Speech of Senator Sherman He Gives the Baltimore and Obio Railroad a Raking. WASHINGTON, D. C. Jan. 6, 1869.

The Governmentshipments from this Sherman and Sheridan in their policy toward the Indians.

The Governmentshipments from this city in 1868, through Wells, Fargo & Co., were about two millions and a half. A large amount was also shipped through, and one from Washington to New York, one from Washington to Pittsburgh, and one from Washington to Pittsburgh, and one from Washington. He argued that Congress had the power of Congress to charter lines of railroad, and the expediency and practicability of extending them from Washington. He argued that Congress had the power, and that it was demanded by every consideration of public policy. His speech was an hour and a half long, and was one for which the Baltimore and Ohio Railroad will not thank him. It was calm and dispassionate in tone, but exceedingly severe on this corporation for the course they have for many years pursued towards the National Capital, and brought out facts of the greatest importance to every citizen who is interested in a safe, speedy and economical way of reaching and leaving Washington. He was also very severe on the city of Baltimore, showing what a proscriptive policy she maintains toward through passengers; how her Plug Ug-

The opponents of the new lines of road had a large lobby on hand and in the galleries. After Mr. Sherman had concluded, the bill was laid over till next Monday, when one of the Maryland Senators will probably speak in defense of the Baltimore and Ohio
